Any Source. Any Destination.

Matrox Mura IPX Delivers 4K Capture and H.264 IP Encoding/Decoding Capabilities to Video Wall Controllers, Multiviewers & Personal Video Walls

Matrox Mura™ IPX 4K capture and IP encode & decode PCI Express® cards provide OEMs and system builders with best-of-breed hardware and software to enhance their video walls and operator workstations with advanced video processing and networking capabilities. Mura IPX boards are ideal for control rooms, digital signage, AV presentation and other applications requiring high-density capture, encoding, streaming, recording, decoding, displaying, and control.

Mura IPX Series Features	Benefits
All-in-One Card	Benefit from HDMI, DisplayPort™ or SDI capture and IP encoding and decoding functionality packed onto a single-slot PCI Express board for simplified integration and significant cost savings
HDCP Capture	HDCP is supported with Mura IPX Capture Series and the Matrox D-Series video wall graphics card
H.264 Level 5.2 Encoding	- Multi-channel, hardware-accelerated H.264 encoding enables streaming and recording of high-quality, low-bitrate, up to UHD quality video over standard IP - Encode up to two 3840x2160 @60Hz, four 3840x2160 @30Hz, eight 1920x1080 @60Hz, sixteen 1920x1080 @30Hz, or numerous SD IP streams on a single board
H.264 Level 5.2 Decoding	- Multi-channel, hardware-accelerated H.264 decoding of IP sources - Decode up to two 3840x2160 @60Hz, four 3840x2160 @30Hz, eight 1920x1080 @60Hz, sixteen 1920x1080 @30Hz, or numerous SD IP streams on a single board
HDMI, DisplayPort and SDI Video Capture	4K video capture in true 24-bit color on up to four HDMI sources, four SDI sources or two DisplayPort sources
System Scalability	Create high-density, low-footprint video wall controllers optimized for performance, thermals, and reliability
Color Space & Pixel Transfer Formats	4:4:4 chroma sampling allows for perfect replication of color 4:2:2 and 4:2:0 chroma subsampling allows for significant bandwidth reduction while maintaining proper viewing quality
Compositing	Create alpha blending, color key, crop, rotation, mirror, & flip effects
On-Board Network Interface Controller (NIC)	Work off a separate, AV-dedicated network and securely add IP cameras, recordings from network-attached storage, live desktop captures, etc., on your video wall without outside intrusion or straining of the host system
Video Wall Management Software	Manage Mura IPX-powered video walls locally or remotely using Matrox MuraControl™ for Windows® or iPad®, as well as third-party software options
API Customization	Leverage easy-to-use APIs for tailor-made video wall management using both local and network-based custom user interfaces
Secure Cable Solutions	Prevent loose cabling with secure Mini HDMI, SDI and DisplayPort solutions

Matrox Mura IPX Capture Series

Paired with
Matrox Mura MPX Series¹

Advantages:

- Up to 56 synchronized outputs
- Single-slot input/output allows high density, flexibility, and scalability
- Universal input support (DVI, RGB/VGA, Component, S-Video, Composite, and SDI)
- Multiple available models for increased functional & thermal reliability
- Passive cooling

Paired with
Matrox D-Series

Advantages:

- Up to 16 synchronized 4096x2160 @ 60Hz outputs
- Available with HDMI or DisplayPort 1.4 outputs for seamless integration with multiple environments
- Over-the-top framelock cable means no additional cards are required for synchronization
- HDCP support
- Microsoft DirectX® 12, OpenGL® 4.5 and OpenCL™ 1.2 support enables latest professional applications
- Windows 10, and Linux² OS support

Paired with
3rd party Graphics³

Advantages:

- High-resolution monitor support, including Full HD and 4K/UHD
- Low-cost integrated or generic professional graphics options
- Multiple available models for various graphical performance requirements
- Microsoft DirectX, OpenGL and OpenCL support enables latest professional applications
- Windows 7, 10, and Linux OS support

² Feature not yet released. Please view Release Notes for latest updates or contact Matrox for more details.

³ See release notes for details on which brands, models and configurations are supported.

Many Software Options to Manage Your Video Wall

Control of your video wall is at your fingertips.

Matrox MuraControl

Matrox MuraControl video wall management software provides an easy and intuitive way to manage your Matrox-based video wall, multiviewer, or personal video wall locally or remotely. Available as a feature-rich, single-license software for Windows or as a free, lighter version app for iPad with drag & drop functionality, it can be used to create and manage layouts offline or in real time.

Key Features

- Easily manage inbound and outbound AV streams
- Create, save, rename, copy, export, import, and delete layouts/presets
- Window transparency and color-keying functions
- Robust upgrade and software-support program
- Position, scale, clone, crop, frame, and label input windows
- Apply color-correction, multi-lingual text overlay, and deinterlacing

Getting Started	• Free 21-day trial software available from Matrox website (USB software license available for purchase)	• Free app available on the Apple® App Store SM
Supported OS	• Microsoft® Windows 7, 10, Server® 2008 R2 and Server® 2012 R2	• iOS 7 and up

Matrox SDKs for OEMs & Developers

Matrox offers a complete range of software, APIs, and libraries that allow OEMs and developers to deploy intuitive, ready-to-use software or build custom interfaces & applications based on project needs. Whatever the installation requirement, Matrox provides the necessary toolkit to build complete end-to-end solutions.

- **DirectShow:** Matrox support for Microsoft DirectShow to enable existing applications using DirectShow filters to capture, decode and encode/stream video.
- **Network API:** Command-level API that can be transmitted from any network computer including traditional PCs, smartphones, tablets, etc. Matrox command-level APIs can be used through Telnet, RS-232, and HTTP/HTTPS.
- **Matrox VWLib API:** A C/C++ based API to build custom capture, streaming and display video wall applications. The VWLib API makes use of DirectX under Windows and OpenGL under Linux.
- **Matrox DWC API:** A C/C++ based API to build, capture, stream, and display video wall applications for enhanced performance, flexibility, and control.

1. Standard resolutions listed above. Support for custom resolutions available. For specific requirements, contact Matrox.

2. Including gold-fingers; not including bracket and connectors.

3. Feature not yet supported. Please view Release Notes for latest updates or contact Matrox for more details.

4. No support for these protocols for encoding purposes. Please see Release Notes for more details.

5. Listed number of streams are in YUV 4:2:0, 12 bits per pixel (8 bits per component). Support for 4:2:2 and 4:4:4 streams also available.

* For the HDMI capture cards only, input resolution is in YUV 4:2:0, 12 bits per pixel (8 bits per component).

** 6G-SDI not supported. Not all 12G-SDI and 3G-SDI formats are supported. Please contact Matrox for more details.
